Fact Sheet Updated 01/2023

PROJECT OVERVIEW

The Costa Mesa Freeway (SR-55) is one of the most heavily congested freeways in Southern California, and traffic is only expected to increase with future demand. SR-55 is a vital link to other major freeway systems in Orange County, and it is the only freeway providing a direct north-south connection between Central Orange County and the coastal region. The project will add one regular lane and one carpool lane in each direction of SR-55 between I-405 and I-5, improving mobility for commuters within Orange County. In addition, the project will add merge lanes between interchanges. This project is part of the OC Go program, also known as Measure M, Orange County's half-cent sales tax for transportation improvements. The project is being constructed in cooperation with Caltrans and is funded through a combination of local, state and federal funds.

PROJECT STATUS

Construction began in August 2022 and is expected to be completed in 2026.
